

XVI-XVIII 1500-1750

			1501-1510	1511-1520	1521-1530	1531-1540	1541-1550	1551-1560	1561-1570	1571-1580	1581-1590	1591-1600	1601-1610	1611-1620	1621-1630	1631-1640	1641-1650	1651-1660	1661-1670	1671-1680	1681-1690	1691-1700	1701-1710	1711-1720	1721-1730	1731-1740	1741-1750		
			1501-1510	1511-1520	1521-1530	1531-1540	1541-1550	1551-1560	1561-1570	1571-1580	1581-1590	1591-1600	1601-1610	1611-1620	1621-1630	1631-1640	1641-1650	1651-1660	1661-1670	1671-1680	1681-1690	1691-1700	1701-1710	1711-1720	1721-1730	1731-1740	1741-1750		
			1500-				1550-					1600-				1650-					1700-					1750-			
			1501-1750																										
Complex number and Calculus																													
	AD 1473-1543	Nicolaus Copernicus	Poland	Copernicus, 70									1514-Copernicus's theory of a universe with the sun at its centre																
alg	AD 1499-1557	N.Tartaglia	Italy	Cubic equation formula Ferro-Tartaglia-Cardano, Nova Scientia 1547																									
alg	AD 1501-1576	G.Cardano	Italy	Cubic equation formula Ferro-Tartaglia-Cardano, 1545 Ars Magna																									
alg	AD 1522-1565	L.Ferrari	Italy	Quartic equation solution in 1540																									
alg	AD 1526-1603	R.Bombelli	Italy	Complex number notation firstly, Bombelli's algebra in 1572																									
alg	AD 1540-1603	Francois Vieta	France	Vieta, 63									1571-Algebra, 1593- π in 10 places, Vieta's theorem, father of modern algebra																
ast	AD 1548-1600	Giordano Bruno	Italy	Bruno, 52									1584-On the Infinite Universe and Worlds, 1600-Burned																
cal	AD 1550-1617	John Napier	Scotland	1614-Logarithms Napier, 67																									
ast	AD 1564-1642	Galilei Galileo	Italy	Galileo, 78									Mountains in Moon using telescope																
ast	AD 1571-1630	Johannes Kepler	German	Kepler, 59									1609, 1619 Three laws of planetary motion																
ast	AD 1546-1601	Tycho Brahe	Denmark	Brahe, 55									1599-Imperial Mathematician, Kepler's teacher																
geo	AD 1596-1650	Rene Descartes	France	1619-Analytic Geometry									Descartes, 54																
num	AD 1601-1665	Pierre de Fermat	France	1637 Fermat's Last Theorem									Fermat, 64																
prob	AD 1623-1662	Blaise Pascal	France	1642-First mechanical adding machine, Probability																									
cal	AD 1638-1675	James Gregory	Scotland	1671-Trigonometric formula, Taylor series, π number																									
cal	AD 1642-1727	Sir Isaac Newton	England	1665-Calculus, 1687-Principia mathematica, Newton's mechanics																									
cal	AD 1646-1716	Gottfried Wilhelm Leibniz	Germany	1673-Calculus, formal logic, 1691 separation of variables																									
cal	AD 1654-1705	Jacob Bernoulli	Swiss	1696-Calculus of variations, brachistochrone problem																									
cal	AD 1661-1704	Guillaume De l'Hôpital	France	1696-L'Hopital's rule for limits																									
cal	AD 1667-1748	Johann Bernoulli	Swiss	1696-Calculus of variations																									
an	AD 1667-1754	Abraham de Moivre	French	1722-De Moivre formula, 1733-statistics																									
	AD 1676-1754	Jacopo Riccati	Italy	1724-Riccati differential equation,																									
	AD 1680-1751	John Machin	England	1706-inverse tangent series, π - 100 decimal places																									
	AD 1685-1731	Brook Taylor	England	1712-Taylor Series, calculus of finite differences																									
	AD 1685-1770	Mingatu	Mongolia	1723-Western Science, 100 completed books, 1735-Quick method for π , Laws of Math, 1730-Astrology book, 1																									
	AD 1690-1764	Christian Goldbach	Russia	1742-Goldbach conjecture, number theory																									
	AD 1702-1761	Thomas Bayes	England	1761-Bayes Theorem, probability																									
	AD 1704-1752	Gabriel Cramer	Swiss	1750-Algebra, Cramer's rule																									
	AD 1707-1783	Leonhard Euler	Swiss	1727-e number, 1736-graph theory									1750-Euler equation, 1777-i-complex																
	AD 1711-1765	M.Lomonosov	Russia	1755 Moskow State University																									
	AD 1717-1783	Jean d'Alembert	France	1754-Theory of limits																									
	AD 1718-1799	Maria Gaetana Agnesi	Italy	1748-Instituzioni analitiche ad uso della gioventù italiana																									
													d'Alembert, 67																
													Agnesi, 81
